COVID-19 Vaccine Education Toolkit

#VACCINESWORKFORYOU

We have all been adjusting to the COVID-19 environment for almost a year. The impact of COVID-19 on our lifestyles has affected us all. The responsibility is ours, as an organization and a community to help stop this virus.

Now we have a new, safe, and effective tool to help us do that – COVID-19 vaccines.

We ask you to join us in protecting yourself, your family, friends, and your coworkers by getting vaccinated. The COVID-19 vaccination is one of the strongest tools we can use to fight this pandemic together.

Here are some things you should know about all the COVID-19 vaccines:
- All COVID-19 vaccines currently available in the United States are very effective against the disease.
- The most common side effects are pain in the arm where you get the shot, tiredness, headache, body aches, chills, and fever.
- Stopping a pandemic requires using all the tools we have available—wearing masks, staying at least 6 feet apart from people who don't live with you, avoiding crowds and poorly ventilated spaces, washing your hands frequently, and **getting vaccinated**.

More information on the COVID-19 vaccine is within this toolkit, along with testimonial accounts from ServiceSource employees and participants like you, who have received or are scheduled to receive the COVID-19 vaccine.

We want everyone in our ServiceSource family to be safe. The distribution of vaccines supports our focus on the safety and well-being of ServiceSource employees and participants. This also helps with our effort to return to a more normal environment and the resumption of key services for the people we support.

We all play a part in this effort, and you are key to its success. Please read through the information within our COVID-19 Vaccine Education Toolkit and sign up to get your COVID-19 vaccine when offered the opportunity. If you have any questions about vaccination clinics or how to sign up, please contact your supervisor.

Let's do this together!

Mark
